FULL-STACK DEVELOPER

Professor Sendhil Mullainathan is looking for a full-stack developer to help with several projects at the Center for Applied Artificial Intelligence. The successful applicant must be a strong developer with some experience in web development. In particular, familiarity with Javascript, HTML/CSS, Angular, and Python (especially Django) is ideal.

The responsibilities of the position will include delivering interactive pages that communicate our research topics, designing online surveys for data collection, and implementation of research software. Successful applicants will have the opportunity to collaborate with our research team and design staff, and interact with machine-learning models for healthcare and criminal justice. This work is varied and challenging, and well-suited to candidates looking to challenge themselves with a variety of projects that provide direct work experience.

This position can start immediately. It will require an average commitment of about 10 hours per week, depending on your availability. If you are interested, please email a CV and brief statement of interest to caai@chicagobooth.edu

The University of Chicago provides equal employment opportunities to all employees, applicants, and job seekers. No person shall be discriminated against in employment or harassed because of race, color, religion, sex, sexual orientation, gender identity, national or ethnic origin, age, disability, veteran status, genetic information, marital status, parental status, ancestry, source of income, or other classes protected by law. This policy includes the commitment to maintaining a work environment free from unlawful harassment.
